## **PRODAGIO CASE MANAGEMENT FROM IMAGITEK RECEIVES DESIGNED FOR EMC DOCUMENTUM ACCREDITATION**

### **All Prodagio Solutions Accredited as Designed for EMC**

**Houston, TX – September 3, 2008** – Imagitek, Ltd., developer of world-class Prodagio™ Software business applications for accounts payable, case management, contracts management and self-service, today announced that its Prodagio Case Management solution has received the “Designed for EMC® Documentum®” accreditation, a mark of quality and value that customers can depend on in enterprise applications. The “Designed for EMC Documentum” accreditation demonstrates that Prodagio Case Management has successfully met a comprehensive set of criteria for good design and quality integration.

Prodagio Case Management joins Prodagio A/P and Prodagio Contracts as Designed for EMC accredited, and extends the Documentum content management platform to provide exceptional efficiency for handling cases of all kinds. Whether in the private or public sector, Prodagio Case Management allows customers to eliminate inefficient, paper-based processes with an automated, consistent and fast solution. Paper-based systems cause bottlenecks, are ripe for errors and hinder visibility, ultimately delaying or adversely impacting critical decision-making.

“EMC’s position as the leader in enterprise content management is strengthened by the support of great partners such as Imagitek,” said Randy Ziegler, Director of Developer Programs at EMC Corporation. “Partners like Imagitek build solutions and applications on the Documentum platform because customers have demonstrated their trust in EMC Documentum to manage their most critical and strategic information. The accreditation program is another way EMC earns that trust while supporting innovative offerings like Prodagio Case Management.”

“We are very pleased to receive accreditation for Prodagio Case Management, as we have previously for our A/P and Contracts Management offerings,” said Mara Henderson, President, Imagitek Ltd. “It’s a reflection of our commitment to EMC’s high standards and our own, as well as the needs of our mutual customers.”

EMC's Designed for EMC Awards named Prodagio Contracts Management product as "Offering of the Year" in 2007, and Prodagio's A/P product received the same honor a year earlier. The Designed for EMC Awards increase awareness of Designed for EMC accredited partner offerings, further promote Designed for EMC accreditation and emphasize the value of strong integration with the EMC Documentum platform. The Awards recognize the best Designed for EMC accredited partner offerings which most optimally address customer needs, have met high standards for integration and have high market potential.

Prodagio Case Management received design accreditation through participation in the Designed for EMC process which is designed to help ISVs, VSPs and SIs design, develop and go-to-market with successful offerings based on the EMC Documentum platform. As a member, Imagitek received specialized design consultation and guidance, along with access to dedicated content management technical resources. Partners can submit their offerings to be considered for the "Designed for EMC Documentum" accreditation – which if achieved, signifies to customers that the offering meets high standards for architectural compliance with Documentum practices and will provide a reliable integration with less uncertainty for joint customers.
